

Dear parents of the Burgschule,

at the end of March 2015, we successfully started a **quick mental arithmetic training** in our school, to help your child towards **successful learning of Mathematics**.

The quick mental arithmetic course for years 1 to 4 forms the foundation of the mathematics lessons in our school.

**The goal is to learn fundamental arithmetic skills off-by-heart.**

The quick mental arithmetic **must** be practiced at home!

Your child needs a **“Mental Arithmetic Trainer”** to practice properly.  
This could be a parent, an older brother or sister, a grandparent, neighbour or family friend.

You, as parent, and the “Mental Arithmetic trainer” can learn at an **information evening**, how you can practice quick mental arithmetic with your child.

**Please come too, even if you were already at the last parent-teacher evening (Elternabend)!**

**You will receive the current practice material for your child at the parent-teacher evening (Elternabend), as the use of the material is best done after an introduction!**

Four of our Mathematics teachers offer an introduction to fast mental arithmetic training to all “Mental Arithmetic Trainers”.

(Frau Lunkwitz: 1<sup>st</sup> class, Frau Stettler: 2<sup>nd</sup> class, Frau Meyer: 3<sup>rd</sup> class, Frau Riemer: 4<sup>th</sup> class)

The whole teaching staff of the Burgschule and the staff of the OGS will be there to advise you!

Date: Wednesday, 28.10.2015

Time: 19:30

Room: Building 1, 2nd Floor (*Gebäude 1, 2. Stock*)

**Help your child – with regular practice they will get better at Maths!**

**If possible, bring someone along who can interpret for you!!!**

With Kind Regards

Anette Schulte, School Principal
